

# **SYNOPSIS**

---

**PRANITH RAO – 4SO18CS088**

**NIREEKSHITH – 4SO18CS081**

# CARING NEST

# APPLICATION IDEA

---

- The main motive of our app is to provide assistance to the users in case of any emergencies.
- With the help of our app, users will get a list of ambulances with all the necessary details and users can contact any of them according to their convenience.

# FEATURES AND USAGE

---

- Admin will add all the details of the ambulances like vehicle number, name, source location, driver name and driver contact number as submitted by the ambulance drivers.
- All these details will be displayed to the user so that they can contact the ambulance in case of any emergencies.
- When the user contacts a ambulance the driver will be notified the user's location and phone number either by email, call or a sms.

# INNOVATION AND UNIQUENESS

---

- This whole app is a unique app as we didn't find any app like this on the playstore.
- We have planned to skip login for users so that time won't be wasted registering and login as our app will be used in case of emergencies.

# SUPPORTED PLATFORMS

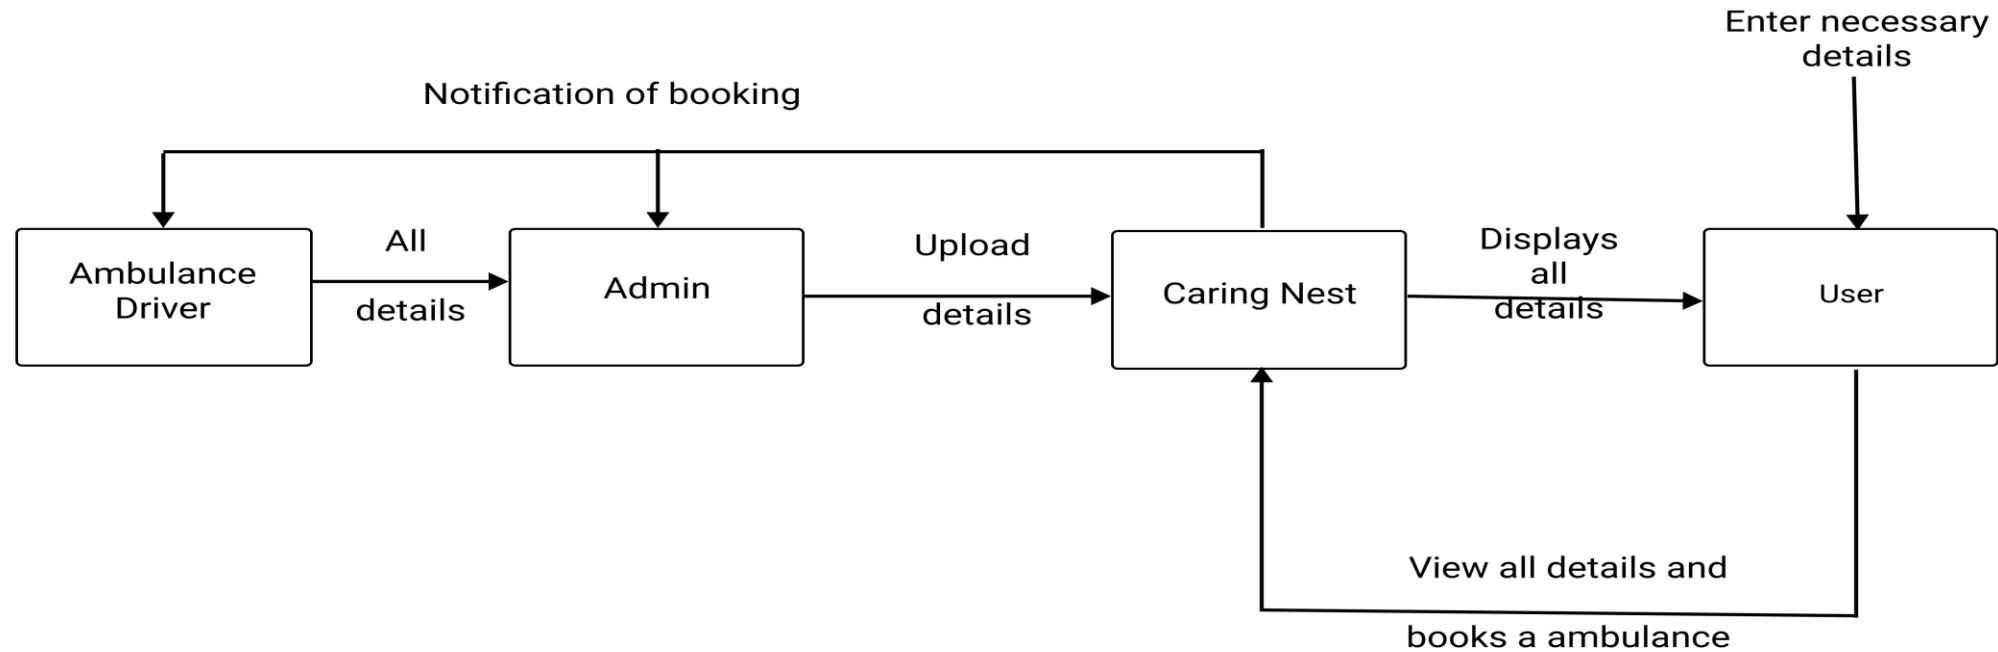

---

- Since we are using android studio for our app development our app will be compatible only for **ANDROID** platform.

# DATA FLOW DIAGRAM

**THANK YOU**
